

Lockout/ Tagout & Test

JTN Course Code – HSSE003

AIM

To provide delegates with an understanding of safe isolation procedures to reduce the risk of injury while equipment, machinery or processes are being inspected, repaired, maintained, assessed, adjusted or cleaned.

COURSE OBJECTIVES

On completion of this module the delegate will understand:

- the importance of isolation procedures
- the importance of training
- the definitions associated with LOTO
- why LOTO is used
- the various types of energy isolating devices
- the various types of LOTO devices
- the various types of energy sources
- the warning tags used in LOTO
- the common methods of isolation
- the six steps used in a LOTO programme
- the proper release from LOTO
- the correct procedure for testing machines / equipment under LOTO

Note! Each delegate will be issued a module handout for future reference.

ASSESSMENT

On completion of the module the delegates will be subject to a 10 question underpinning knowledge assessment. A pass mark of 75% is required

CERTIFICATION

Delegates successfully meeting the requirements of the module will be issued a JTN Certificate of Achievement.

REVALIDATION

There is no revalidation period for this training module, but refresher training is recommended every 2 years.

WHO SHOULD ATTEND

- All Authorized Employees who lockout & tag - out specific machines or equipment.
- Affected Employees who operate or carry out maintenance or servicing work. These people need training to understand the importance and use of energy control procedures. These people do not perform lockout & tag – out.
- Other Employees are people who may be in the area. These people need training to understand why they must never try to restart or energize equipment that has been locked and/or tagged.

PREREQUISITES

There are no pre-requisites for this module.

LOCATION

- JTN Training Centre, Miri, or
- Client's premises if suitable facilities are available*

DURATION

1 day

PARTICIPANTS

Minimum of 4, Maximum of 10
